Product Benefits

Feature(s)	Benefit(s)
The active ingredient Bifenthrin (100 g/L) , is a synthetic pyrethroid which has been engineered for broad spectrum, fast knock-down, residual activity.	This broad-label formulation, provides a comprehensive, long-term answer, to all your insect control needs.
The Biforce 100SC formulation is water based. No hydrocarbon solvents!	Biforce 100SC can be used indoors and outdoors, with no concern for smell, staining or damage to equipment.
Using a specialized milling technique, uniform, micron-sized bifenthrin particles (Consistently 90% less than 7.5 microns) are produced for suspension in this aqueous formulation.	The Bifenthrin particles in Biforce 100SC are consistently the smallest of any Bifenthrin 100SC currently sold in the market. Smaller particles aid in better dispersion of the Bifenthrin particles.
Biforce 100SC is non-allergenic and non-sensitizing.	Technicians and customers are less likely to experience skin irritation associated with other insecticide formulations.
Biforce 100SC will bind strongly to treated surfaces, is insoluble in water, and is highly stable in sunlight.	Biforce 100SC is rainfast, and resists degradation by sunlight and heat – even under the most extreme conditions!
Biforce 100SC is approved for both pre-construction and post-construction termite management. The formulation kills and repels termites.	Your total termite management solution, which provides the longest protection period available!
Biforce 100SC is formulated with only the highest quality ingredients, from a single facility in accordance with ISO9001, ISO14001 & GMP.	The Biforce 100SC quality formulation supplied is guaranteed to be consistently the same each time, every time!
Biforce 100SC is supplied with comprehensive Certificates of Analysis.	You can be confident in consistent results each time, every time!
Biforce 100SC has been independently evaluated for efficacy in the laboratory and the field.	Biforce 100SC has been proven to work as a contact and residual insecticide and termiticide.
